## Portfolio Manager Commentary – cont'd

---

Volatility remained low through most of the quarter and hit an all-time low towards the end of November as stocks rallied and investor sentiment was on the rise.

Given the extreme low levels of volatility, the Fund saw less opportunities in its covered-call writing strategy and, on average, the Fund was written on 3.5% during the quarter versus 3.8% in the previous quarter.

The U.S. dollar was mostly hedged back into Canadian dollars throughout the period and ended the year with approximately 100% of the U.S. dollar exposure hedged. The U.S. Dollar increased .3% vs. the Canadian dollar during the quarter.
