Fund Overview

The Fund is a split share corporation designed to provide investors with exposure to six Canadian banks. The Fund utilizes Strathbridge's proprietary SSO covered call writing strategy to enhance the income generated by the portfolio and to reduce volatility.

Objectives

The fund's investment objectives are:

- to provide Preferred shareholders with cumulative preferential quarterly cash distributions of \$0.215625 per share, representing an annual yield of 5.75% on the original issue price of the Preferred shares; and
- to provide Class A shareholders with quarterly cash distributions of \$0.20319 per share; and
- to return the original issue price to holders of both preferred share and Class A shares upon windup of the Fund.

Rationale

The six Canadian banks have a history of strong earnings growth, which has resulted in increases in their dividend rates and share price appreciation. The preferred shares are appropriate for an investor looking for a more secure investment than common equities with an attractive distribution. The class A shares are appropriate for an investor seeking a leveraged play on the six banks included in the portfolio while earning attractive distributions.

Portfolio Manager Commentary – April 2018

The Canadian banks declined during the period with the S&P/TSX Diversified Banks Sub Index down 4.2% on a total return basis, underperforming the broader S&P/TSX Composite Index which fell 1.4% over the same period.

Each of the banks within the portfolio declined during the quarter with The Bank of Nova Scotia ("BNS"), which lagged the group last quarter, leading the way with a total return of -2.4%. Meanwhile, the Canadian Imperial Bank of Commerce ("CM") which led the group last quarter, lagged the group with a total return of -7.1% during the period.

Commentary cont'd on next page

Portfolio Manager Commentary – cont'd

The Bank of Nova Scotia, Canadian Imperial Bank of Commerce, Royal Bank of Canada and the Toronto-Dominion Bank each announced a dividend increase in the quarter, increasing it by 3.8%, 2.3%, 3.3% and 11.7% respectively.

Volatility levels for the Canadian banks picked up during the period along with broader market volatility due to concerns regarding trade policy, rising interest rates and market valuations. Although still quite low on an absolute basis, the covered-call writing did pick up during the quarter with an average 11.6% of the portfolio subject to covered calls vs. 4.2% in the previous quarter.
