Sector Allocation⁽⁴⁾

(Notes:

(1) As at June 30, 2017

(2) Distributions on the Class A shares have been suspended in accordance with the Prospectus as the NAV per Unit is less than \$15.00

(3) Calculated as most recent distribution annualized divided by closing market price on June 30, 2017

(4) Calculated as percent of gross assets not including other liabilities

Fund Overview

The Fund is a split share corporation which invests in common equity securities selected from the ten largest financial services companies by market capitalization in each of Canada, the United States and the Rest of the World. The Fund utilizes Strathbridge's proprietary SSO covered call writing strategy to enhance the income generated by the portfolio and to reduce volatility.

Objectives

The fund's investment objectives are:

- to provide holders of Preferred shares with fixed cumulative preferential quarterly cash distributions in the amount of \$0.13125 per Preferred share representing a yield on the issue price of the Preferred shares of 5.25% per annum;
- to provide holders of Class A shares with regular quarterly cash distributions targeted to be 8.0% per annum; and
- to return the issue price to holders of both Preferred Shares and Class A Shares at the time of redemption of such shares on the termination date.

Rationale

While the global financial services market has experienced one of the worst financial crises in history, the investment manager believes the global financial services sectors are poised to provide strong returns over the next several years. The preferred shares are appropriate for an investor looking for a more secure investment than common equities with a high level of income. The Class A shares are appropriate for an investor seeking a highly leveraged play on the global financial services industry.

Portfolio Manager Commentary – June 2017

Global equity markets for the most part maintained or continued their strong first quarter rally through the second quarter of 2017. The MSCI Emerging Markets Index was one of the strongest performing indices in the second quarter with a total return of 6.4%, while the S&P 500 Index in the U.S. was up 3.1%. Here in Canada, the S&P/TSX Composite Index declined 1.6% as weakness in the energy and materials sectors dragged down the performance.

During the period the MSCI World Financial Services Index advanced to 115.32 from 110.54. Stocks held within the portfolio had varying returns led by insurer ING Groep N.V. which was up 15.4%. This was offset by our holding in Westpac Banking Corporation which declined 7.5%, while held within the Fund.

Portfolio Manager Commentary – cont'd

While volatility remained subdued overall, it spiked for a brief period in the middle in April and May before drifting back toward historically low levels. The call writing activity was opportunistic over the period and took advantage of signals generated by the Strathbridge Selective Overwriting (“SSO”) strategy. The Fund ended June 30, 2017 with 3.7% of the Fund subject to covered calls vs. 1.1% the previous quarter.

The Fund ended the quarter with a cash position of 2.6% vs. 4.2% the previous quarter.

The U.S. dollar was mostly hedged back into Canadian dollars throughout the period and ended June with approximately 100% of the U.S. dollar exposure hedged, helping negate some of the negative impact of the 3.5% decline in the U.S. dollar vs. the Canadian dollar during the quarter.

Manager

- ✓ Strathbridge Asset Management Inc., experienced issuer with 10 listed closed-end funds
- ✓ One of Canada’s most experienced option strategy managers, with over 20 years of investment management experience in Canada
- ✓ Proprietary selective call writing strategy utilized to enhance income generated from the portfolio and reduce volatility
