Results of Operations

The net asset value for pricing purposes of the Fund at June 30, 2007 was \$18.50 per unit compared to \$19.12 per unit at December 31, 2006. The Fund's units listed on the Toronto Stock Exchange as PRC.UN, closed on June 29, 2007 at \$17.30 representing a 6.5 percent discount to the actual net asset value.

No distributions were paid to unitholders during this period. The total return of negative 3.2 percent during this period was primarily due to changes in interest rates, which adversely affected the value of fixed portfolio. This is comparable to the return on the Bloomberg/EFFAS Bond Indices Canada Government 10+ Year at negative 4.8 percent during the same period.

During the first six months of the year, 151,975 units were redeemed by the Fund. The Fund facilitated these redemptions by unwinding a portion of the forward agreement from the fixed portfolio. These activities had no material impact on the Fund performance.

Management Report on Fund Performance

Management Fees

Mulvihill Capital Management (“MCM”) is entitled to fees under the Investment Management Agreement calculated monthly as 1/12 of 1.10 percent of the net asset value of the Fund at each month end. From August 2004 to October 2005 the Investment Manager voluntarily agreed to defer payment of a portion of its investment management fees. These deferrals in the investment management fees represented decreases in direct proportion to the decline in targeted distribution rates, to a minimum annual investment management fee rate of 0.40 percent of the Fund’s net asset value. Commencing November 2005 investment management fees were reduced from a monthly rate of 1/12 of 1.10 percent to a monthly rate of 1/12 of 0.40 percent, plus applicable taxes, as required by the prospectus when the Fund has not paid distributions for six or more consecutive months. During the year the Investment Manager collected fees at an annual rate of 0.35 percent of the Fund’s net asset value. The Investment Manager may choose at any time to require payment of all or any portion of these investment management fees voluntarily deferred.

Services received under the Investment Management Agreement include the making of all investment decisions in accordance with the investment objectives, strategy and criteria of the Fund. MCM also makes all decisions as to the purchase and sale of securities in the Fund’s portfolio and the execution of all portfolio and other transactions.

Mulvihill Fund Services is entitled to fees under the Management Agreement calculated monthly as 1/12 of 0.10 percent of the net asset value of the Fund at each month end. Services received under the Management Agreement include providing or arranging for required administrative services to the Fund.

Recent Developments

The primary investment objective of this Fund is to maintain the redemption value of \$25.00 per unit to be returned to unitholders on the termination date of December 30, 2016. To meet this objective, exposure to equities has been eliminated. The managed portion of the Fund holds only cash and cash equivalents while the fixed portfolio contains a forward agreement, which is structured to return \$25.00 per unit outstanding on the termination date, and equity securities that have been pledged as security for the obligations under the forward agreement.

As anticipated, the tightening cycle slowed in the middle of 2006; there have been no rate hikes in Canada since May 2006. The yield curve has remained relatively flat, however there has been slight

Mulvihill Pro-AMS 100 Plus (Cdn \$) Fund

Management Report on Fund Performance

upward pressure on mid and longer term yields which has the effect of reducing bond prices. This has adversely affected the value of our fixed portfolio.

The Fund remains sensitive to changes in interest rates and the shape of the yield curve.

Past Performance

The chart below sets out the Fund's year-by-year past performance. It is important to note that:

- (1) the information shown assumes that all distributions made by the Fund during these periods were reinvested in the Fund,
- (2) the information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns, and
- (3) the past performance of the Fund does not necessarily indicate how it will perform in the future.

Year-By-Year Returns

The bar chart below illustrates how the Fund's total return for each of the past six years including the six month period ended June 30, 2007 has varied from period to period. The chart also shows, in percentage terms, how much an investment made on January 1 in each year or the date of inception in 2001 would have increased or decreased by the end of that fiscal year, or June 30, 2007 for the six months then ended.

Notes to Financial Statements

June 30, 2007

1. Basis of Presentation

The interim financial statements for the Fund have been prepared in accordance with Canadian generally accepted accounting standards ("GAAP"). However, not all disclosures required by GAAP for annual financial statements have been presented and, accordingly, these interim financial statements should be read in conjunction with the most recently prepared annual financial statements for the year ended December 31, 2006.

These interim financial statements follow the same accounting policies and method of application as the most recent financial statements for the year ended December 31, 2006, with the exception of CICA handbook section 3855 which was adopted beginning January 1, 2007, as discussed below in Note 2.

2. New Accounting Standards

The Canadian Institute of Chartered Accountants issued new accounting standards relating to Financial Instruments which became effective for the Fund from January 1, 2007. The new standards require that the fair value of securities which are traded in active markets be measured based on bid price and transaction fees, such as brokerage commissions, incurred in the purchase or sale of securities by the Fund be charged to net income in the period incurred. These new standards have been adopted prospectively with no restatement of prior periods' comparative amounts.

For financial reporting purposes, the investments have been valued using closing bid prices.

As a result of regulatory relief received from the Canadian Securities Administrators, on implementation of the new standards, the above changes will not impact the net asset value per unit used to transact units of the Fund which will continue to be based upon securities valued at the last sale price.

3. Net Asset Value and Net Assets

For financial statement reporting purposes, the Fund applies Canadian generally accepted accounting principles requiring the Fund to value its securities using bid price. However, pursuant to a temporary exemption provided by the Canadian securities regulatory authorities, the Fund can calculate its net asset value using last sale price.

The difference between the net asset value and the net assets reflected in the financial statements is as follows:

Net Assets (for financial statement purposes)	\$ 18.50
